TEST REPORT NO 551201/23/GDY

Client SFD SPÓŁKA AKCYJNA GŁOGOWSKA 41 45315 OPOLE		Sample (according to declaration of Client) Sample description: ALLNUTRITION GREEN LINE ERYTRYTOL 500 g Batch: 523041801	
Sample reception date:	09.10.2023	Sample status: no objections	
Start of analysis	13.10.2023		
End of analysis	17.10.2023	Sample received from the Client	
Test report date	17.10.2023	- Campio 10001100 mon. and Campio	

Test Method	Unit	Result		
* Content of elements ¹⁾ PN-EN 15763:2010				
Lead (Pb)	mg/kg	< 0,010 (0,010 ± 0,003)		
Cadmium (Cd)	mg/kg	< 0,0010 (0,0010 ± 0,0002)		
Mercury (Hg)	mg/kg	< 0,0010 (0,0010 ± 0,0002)		

The lower limit of the measuring range of the accredited method, which is also the limit of quantification set by the Laboratory.

Authorized by:

Katarzyna Szpinda, Analysis Expert, Spectrometry Laboratory

The test report bears the certified electronic seal of J.S. Hamilton Poland Sp. z o.o.

Laboratory address:

Chwaszczyńska 180, 81-571 Gdynia

The results refer only to the samples received. When a measurement uncertainty is given, it is an expanded uncertainty estimated for a coverage factor k=2 at 95% confidence level and is not including sampling uncertainty, unless otherwise stated. When the conformity is stated J.S. Hamilton Poland Sp. z o.o. applies the simple acceptance decision rule in accordance with ILAC-G8:09/2019, unless otherwise reported. If the "result" column of the accredited method contains a record: "c" or ">", it means, that it is the test outcome directly related to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the lower or upper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the Organical sequence of the proper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty relates only to the open expanded measurement uncertainty and the proper limit of the measuring range of the accredited method, whereas the given expanded measurement uncertainty expanded measurement uncertainty expanded measurement uncertainty and the proper limit of the

* Test method accredited
